

96-Well Filter Plate

Catalog Number: EZ96FTP (with 10 µm filter), 10 Plates/case,

Product Information:

Description:

Enzymax 96-Well Filter Plate is manufactured from medical grade polypropylene. The plate contains a 10 µm filter in each well, which was secured by a blue O-ring. They can be used to remove cell debris and viscous proteins from genomic and plasmid DNA isolation before loading samples to 96-well DNA/RNA binding plate to avoid clogging the binding plate.

Specifications:

- Contains 10 µm filter in each well and secured by a blue O-ring
- Notched corner to facilitate orientation
- Used with Centrifuge (with 96-well plate adaptor) and vacuum manifold
- Column capacity: 960 µl each well
- Dimensions (W x D x H): 126 mm x 84 mm x 37 mm
- Weight: 108 g
- Package: 10/case (double wrapped)
